Accessibility

These checks highlight opportunities to <u>improve the accessibility of your</u> <u>web app</u>. Automatic detection can only detect a subset of issues and

does not guarantee the accessibility of your web app, so <u>manual testing</u> is also encouraged.

ARIA

▲ ARIA input fields do not have accessible names

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

INTERNATIONALIZATION AND LOCALIZATION

<html> element does not have a [lang] attribute

These are opportunities to improve the interpretation of your content by users in different locales.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on <u>conducting an accessibility</u> <u>review</u>.
